Summary

Degree in Computer Science, I am a Web developer with 8 years experience in building high quality web applications. I have developed quality webapps on Ruby on Rails since 2008. Worked 6+ years with Rails in TDD with RSpec, Capybara and selenium. 3+ years in React / React Native and Angular. I am passionate about emerging technologies, building scalable software, and supporting industry best practices. Developing a number of complex systems such as e-commerce sites, inventory management systems and scheduling systems, I could feel every client's idea. My experience is also augmented with knowledge in 3NF database normalization, usage of design patterns in everyday programing and building micro services.
